Minutes						

All committee members were able to review changes submitted and make comments prior to the meeting. All members were satisfied with changes. BSL2 containment is sufficient. One member requested that PI submit vector maps for all constructs using toxins so that the information is on file, but member had no concerns pertaining to the vector maps. Motion was made to approve this protocol pending the submission of the vector maps and that the Chair can approve the protocol once vector maps are filed. It does not need to come back to committee. The motion passed with all in favor.
