IBC-00000190	Gitau, Mark	Pending	7	0	0	Yes

Minutes

The committee discussed the study and felt all concerns were addressed, except one. The committee would like more detail on the safe guards that will be in place to insure the INT that is made from the patient's own cells is given back to that patient.

The committee voted that this protocol be approved once the safe guards are explained. The chair may approved at that time without it coming back to full committee.
