

Jedi Genetics: Exploring Genetics and Biomarkers Through a Star Wars Lens

What secrets can be discovered about our health and identity at the molecular level? In this one day program, students will learn about the uses of DNA and biomarkers in the diagnoses of conditions. Students will perform an ELISA and gel electrophoresis.

Open to students grades 6-8 in the current school year.
Full attendance is required.

June 14th, 2024 from 8:30am-3:00pm in Bismarck, ND at
