WHAT MAKES ME UNIQUE?

Fill out the questions below as you progress through the What Makes Me Unique? lesson and slideshow.

1. Look at the images on the slideshow. What do they have in common? What is different about them?

2. What happened when you combined the strawberry mixture with the cold alcohol?

3. Describe the DNA. What does it look like? What does it do? What is its function?

4. Write at least three things you learned about DNA and what makes you unique.

TOTALLY
AWESOME
SCIENCE

Here's what I did today!

I visited the virtual Sanford Research PROMISE lab to learn about what makes me unique. I learned that all living things have DNA. This is what gives me my physical traits. I got to see DNA when I extracted it from a strawberry.
